

## Environmental Policy

- We shall assume full responsibility through all steps of our production chain by understanding and fulfilling applicable laws, expectations from our stakeholders and other requirements.
- We shall, based on a lifecycle perspective, promote sustainable development for the benefit of present and future generations.
- We shall strengthen our environmental commitment through verification of materials and products in the planning stage, in order to be able to reduce the use of environmentally harmful materials.
- We shall contribute to better environmental conditions by minimizing our consumption of natural resources and increasing the share of environmentally friendly chemicals by integrating environmental studies already at the design and purchase process.
- We shall reduce the impact of emission from our processes by prioritizing local suppliers as far as possible.
- We shall work actively with reuse, separation and recycling of materials.
- All employees shall be engaged in the environmental work

A handwritten signature in blue ink, appearing to read 'Ola Wallster', is written in a cursive style.

Ola Wallster
